Offline latent domains and detector training
Source train
12,742 images
Frozen backbone
feat1: 128 x 80 x 80
Channel mean/std
256D + train Z-score
K = 2..8
structure + stability
Fixed K = 2
centres + hard IDs
fixed assignment
Source images + boxes
fixed domain IDs
Student + domain module
detection + object Triplet
EMA detector
min source-val loss
Seven-domain test
standard class score
Source validation: assignment / checkpoint selection only. Target tests: evaluation only.
